Job Title: Applied Research Scientist

Positions: 2

Salary: Commensurate with experience

Location: Abingdon, Oxfordshire

Time-frame: Immediate

P2i is the world leader in liquid repellent nano-coating technology. Following recent investment in our business, we are undergoing rapid growth to meet the increasing global demand for our technology platform and to support development of our technology into new areas. P2i is a well funded, professionally run business with a clear strategic direction.

We seek highly self-motivated Senior Scientists \ Scientists to join the Applied Research team to adapt P2i's plasma enhanced chemical vapour deposition process for a variety of materials and products.

We are looking for individuals with:

- Qualifications to degree or PhD level in chemistry, physics or materials science.
- Knowledge of plasma CVD processes
- Knowledge of analytical techniques, particularly for surface analysis
- Experience of working in a commercial and scientific environment.
- Experience in coatings for electronics, textiles, or solar applications would be particularly relevant.

Ideal candidates will be:

- Technically adept
- Flexible to changing requirements
- Motivated to deliver practical results
- Self-sufficient and a team player
- Excellent communicators.

This job would be ideal for a person passionate about developing new technologies with a firm focus on commercialisation and implementation. Experience gained within an ISO9001 environment would be an advantage.
